3、 To pre-array the tiles, we should first make two vertical lines on the ground, and check the horizontal level with horizontal rule, check the vertical level with a weight.

4、 To avoid surrounding because of the difference of ceramics heat swelling factors and concrete heat swelling factors, confirm the lines and keep ash slot according to the tile sizes: 3mm (for external wall tiles), 1.5mm (for interior wall tiles), 3-5mm (for floor tiles), 5-15mm (for imitating stone tiles).
